

Prof. Dr. Zhenzhong Yu

Personal: Born in Qingdao, China
Professor of Microbiology
College of Resources and Environmental Sciences
Nanjing Agricultural University
Weigang Road 1, Nanjing, China
Phone: +86-(0)25-8439-9963
E-mail: yuzhenzhong@njau.edu.cn

Research: Microbiology, Fungi, Fungal Genetics and Cell Biology
Light, as one of the most important environmental cues, regulates also the physiological and morphological processes of fungi. For instance, light regulates asexual and sexual development, secondary metabolism, phototropism, circadian clock, nutrition uptake and pathogenesis of fungi. Many fungi have been equipped with red-light receptor phytochrome, blue-light receptor White Collar-1, VVD and cryptochrome, and green-light receptor opsin during evolution. We are currently using *Trichodema guizhouense* and *Aspergillus nidulans* as model organisms to investigate how fungi sense light and how light signal is transmitted in fungal cells.

Education Background and Work Experience

2019.05-	Nanjing Agricultural University	Professor
2016.10-2019.05	Karlsruhe Institute of Technology (KIT), Institute for Applied Bioscience	Postdoc
2016.10	Karlsruhe Institute of Technology (KIT) Institute for Applied Bioscience	Ph.D.
2012.09	East China University of Science and Technology	Master
2009.07	Yantai University	Bachelor
